Education

Medi-caps University

Bachelor of Technology in Computer Science Engineering, CGPA: 8.0

Aug 2022 – May 2026

Indore, India

Work Experience

IQPaths Technologies

Software Development Engineer Intern

Feb 2025 – May 2025

Indore, India

- **Devised** the frontend architecture for a course-selling platform utilizing **React.js**, handling **1,000+ users** and reducing page load times by **25%** through optimized component rendering.
- **Integrated** dynamic content via **15+ REST APIs** using **Axios**, ensuring seamless data consistency and decreasing data fetch latency by **20%**.
- **Engineered** multiple responsive pages for an **AI-powered resume builder** utilizing **TypeScript** and **Redux**, scaling the platform to support **500+ concurrent users** with centralized global state management.
- **Constructed** highly modular user interfaces utilizing **Tailwind CSS**, increasing component reusability and reducing frontend development time by **30%** for subsequent feature rollouts.

Projects

Quick Chat App

May 2025 – Jun 2025

- **Key Skills:** ReactJS, Node.js, Express.js, MongoDB, Socket.io, Context API, Cloudinary, JWT
- **Developed** a full-stack real-time chat application utilizing **React (Vite)**, designed to handle **100+** concurrent user connections with sub-**50ms** message latency.
- **Engineered** real-time bidirectional communication utilizing **Socket.io** and the **Context API** for highly responsive global state management.
- **Implemented** secure user authentication and **JWT-based session management**, protecting **100%** of restricted API routes.
- **Added** profile management with secure image uploads via **Cloudinary**, optimizing media delivery speed by **30%**.
- **Integrated MongoDB** for persistent storage of user schemas and message history, maintaining strict data integrity.

The Paypr Story

Final Year Project – 2025

- **Key Skills:** ReactJS, NodeJS, ExpressJS, MongoDB, TailwindCSS, Razorpay, Multer
- **Developed** a centralized document management platform to serve **5,000+** campus students, eliminating manual printing queues via a **token-based verification system**.
- **Built** a responsive interface using **React.js** and managed complex document processing up to **25MB** per file utilizing **Multer**.
- **Integrated** secure, automated transaction processing utilizing the **Razorpay API**, handling **100%** of payment verifications with zero manual intervention.
- **Constructed** a comprehensive **admin panel** to monitor operational workflows and daily print requests efficiently.
- **Engineered** scalable backend APIs using **Node.js**, **Express.js**, and **MongoDB** for robust order tracking and payment management.

Technical Skills

Languages: C, C++, JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js (Redux Toolkit, Context API, React Router), Node.js, Express.js, Tailwind CSS

Web Technologies & APIs: RESTful APIs, Socket.io, JWT, bcryptjs, Cloudinary, Multer, Razorpay API

Databases & ORMs: MongoDB (Mongoose), MySQL

Tools & Infrastructure: Git (GitHub), Postman, Docker,

Online Profiles

LeetCode: leetcode.com/u/sourabhlathi — **GitHub:** github.com/Sourabh-ctrl —

Relevant Coursework

Core Subjects: Data Structures and Algorithms, Operating Systems, Computer Networks, Database Management Systems, Object-Oriented Programming

Additional Subjects: Introduction to C/C++, Discrete Mathematics, Programming Languages (Java), Theory of Computation, Machine Learning
